In re patent application of
NAKAO et al.

Serial No. 09/804,293

Group Art Unit: 1712

Filed: March 13, 2001

Examiner: unassigned

Title: SETTING COMPOSITION, AND INK, PAINT AND ADHESIVE CONTAINING
THE SAME COMPOSITION**PETITION UNDER 37 C.F.R. §1.182 RELATED TO QUESTIONS NOT
SPECIFICALLY PROVIDED FOR**Commissioner for Patents
Box DAC
Washington, D.C. 20231

Sir:

This is a petition under 37 C.F.R. §1.182 for entry of the substitute specification filed herewith and petitions for the application, along with the entered substitute specification, to be accorded a filing date of March 13, 2001.

The application papers for the above-identified application were deposited with the Patent and Trademark Office (Office) and accorded a filing date of March 13, 2001. The deposited application papers include a specification, a certified copy of Japanese Patent Application No. 2000-069881 filed March 14, 2000, and a certified copy of Japanese Patent Application No. 2000-075653 filed March 17, 2000.

A Notice to File Missing Parts of Nonprovisional Application was mailed on April 12, 2001. The Notice indicated that the oath or declaration deposited with the application papers on March 13, 2001.

In response to the Notice, a signed Declaration and a copy of the Notice are provided along with this petition.

While preparing the response to the Notice, a review of specification as originally filed revealed an error between the English text of the specification and the content contained within the Japanese Patent Applications. Specifically, the English text of the specification as originally filed did not accurately represent the content contained within the Japanese Patent Applications.

Nevertheless, on page 11 of the specification as originally filed, at lines 6-9, Japanese Patent Application Nos. 2000-069881 and 2000-075653 were incorporated into the specification by reference.

Accordingly, a substitute specification and a marked-up copy of the substitute specification are provided along with this petition. The substitute specification includes the English text of content contained within the certified translation of Japanese Patent Application No. 2000-069881. The certified translation of Japanese Patent Application No. 2000-069881, along with a statement that the translation is accurate, is attached hereto as Attachment I. The substitute specification also includes the English text of content contained within the certified translation of Japanese Patent Application No. 2000-075653. The certified translation of Japanese Patent Application No. 2000-075653, along with a statement that the translation is accurate, is attached hereto as Attachment II. Please accept the concurrently filed English language translations and statements.

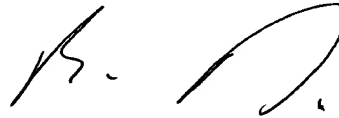

Applicant hereby petitions for entry of the substitute specification filed herewith and petitions for the application, along with the entered substitute specification, to be accorded a filing date of March 13, 2001.

Applicants further petition the use of the substitute specification as the specification for examination purposes in the Office.

The Commissioner is hereby authorized to charge \$130.00 to Deposit Account 18-0013 to cover the petition fee. 37 CFR §1.17(h).

The Commissioner is also authorized to charge any additional fees associated with this communication to Deposit Account No. 18-0013 for any additional costs that may be incurred.

Respectfully submitted,

Brian K. Dutton
